

WAGNER

SPRAY GUNS

CAT Packs

Ready to Spray CAT Pack System

The CAT Packs and Smart Packs offer multiple ranges of nozzle and needle combinations to spray thin to thick viscosity materials, making them your one stop shop in spray gun needs. We offer multiple versions for situations such as on site low cfm needs to industrial shops where cfm is not an issue.

Smart Pack

- Spray gun
- 2 air caps
- 3 needle and nozzle setups
- Tools

Aluminum Cup Pack

- Spray gun
- 2 air caps
- 3 needle and nozzle setups
- Tools
- Air or fluid regulator
- Aluminum cup

3M PPS™ Cup Pack

- Spray gun
- 2 air caps
- 3 needle and nozzle setups
- Tools
- Air or fluid regulator
- 3M PPS™ hard cup
- 3M PPS™ lids and liners (3 pack)
- 3M PPS™ adapter fitting

 Available in a CAT Pack.*

Pressure Reduced

CAT-X

Ultimate Fine Finish (Gravity Feed)

The CAT-X provides the ultimate fine finish with top tier atomization, handle ergonomics, and fluid delivery superior to all the competitive guns on the market today. The CAT-X includes the HVLP air cap and the pressure reduced air cap to meet all the codes and regulations throughout the United States.

Features

- Designed and built for the professional finisher.
- Fine finish atomization.
- Lightweight with an ergonomic handle.
- High transfer efficiency.
- All stainless steel fluid passage.

CAT-Xpress

Ultimate Fine Finish (Pressure Feed)

The CAT-Xpress provides extreme atomization while holding an excellent transfer efficiency, handle ergonomics, and fluid delivery superior to all the competitive guns on the market today. The CAT-Xpress includes a HVLP air cap and the pressure reduced air cap to meet all the codes and regulations throughout the United States.

Features

- Designed and built for the professional finisher.
- Fine finish atomization.
- Lightweight with an ergonomic handle.
- High transfer efficiency.
- All stainless steel fluid passage.

 Available in a **CAT Pack**. See first page for details.*

Pressure Reduced

CPR Series Premium Fine Finish

The CPR spray guns from CAT combine the transfer efficiency of HVLP with the speed and finish quality of conventional air spray. The nozzle requires 11 cfm at 29 PSI recommended inlet pressure. The CPR guns are available in both pressure feed and gravity feed versions.

Features

- Fine finish atomization.
- Speed and quality of a conventional spray gun.
- High transfer efficiency.
- All stainless steel fluid passage.

CPR

- Full size pressure feed model
- All stainless steel fluid passage.

CPR-G

- Full size gravity feed model
- All stainless steel fluid passage.

CPR-FE

- Smaller size pressure feed model.

CPR-T3

- Full size gravity feed model for the weekend warrior.

 Available in a **CAT Pack**. See first page for details.*

Aircoat / Air Assisted Airless

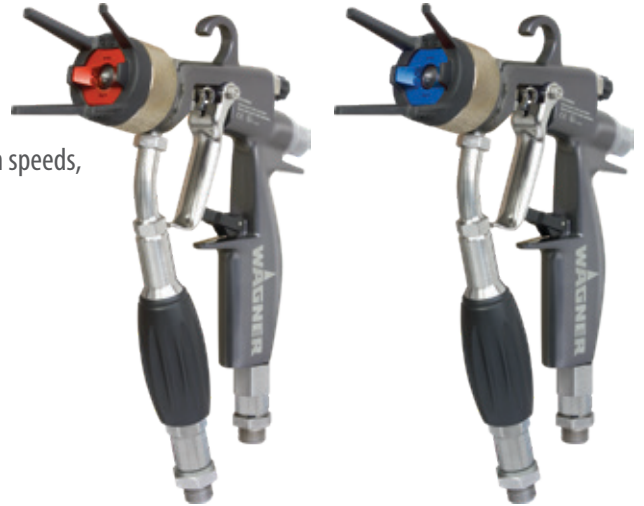

GM 4700AC

High Pressure Manual Aircoat Spray Gun

The GM 4700AC applies aircoat technology for a high transfer efficiency, production speeds, and a quality finish.

Features

- Superior atomization capabilities.
- Tool free removable filter.
- Full size handle.
- Stainless steel fluid passages, ideal for solvent or water based materials.

Bobcat

High Pressure Compact Manual Aircoat Spray Gun

The Bobcat Air Assisted Airless gun is designed for production wood and metal finishing. Features include a lightweight design, stainless steel fluid passages and an integrated fluid filter.

Features

- Superior atomization capabilities.
- Compact handle size.
- Stainless steel fluid passages, ideal for solvent or water based materials.
- Lightweight with an ergonomic.

Cougar

High Pressure Manual Aircoat Spray Gun

The Cougar Air Assisted Airless gun is designed for production wood and metal finishing. Features include a robust full size design, stainless steel fluid passages and an integrated fluid filter.

Features

- Superior atomization capabilities.
- Full size handle
- Stainless steel fluid passages, ideal for solvent or water based materials.

HVLP

Jaguar 100H

Jaguar 100 Series HVLP (Gravity Feed)

The Jaguar HVLP series spray guns are high quality sprayers designed for fine atomization of materials with the product savings of HVLP technology. All Jaguar's come complete with an all stainless steel fluid passage and setups including the tip and air cap making this ready to spray out of the box.

Features

- Stainless steel fluid passages, ideal for solvent or water based materials.
- High transfer efficiency with HVLP technology.
- Low CFM options for onsite use with a portable compressor.

FE-LCFM

Finish Excellence - Low CFM (Pressure Feed)

The FELCFM spray guns are high quality sprayers designed for fine atomization of materials with the product savings of HVLP technology.

Features

- High transfer efficiency with HVLP technology.
- Low CFM options for onsite use with a portable compressor.

T3

Techline T3 (Gravity Feed)

The Techline T3 is a gravity feed gun for use with a wide range of coatings from primers to top coats and stains.

Features

- High transfer efficiency with HVLP technology.
- Fine finish atomization.
- Designed for the weekend warrior.

 Available in a **CAT Pack**. See first page for details.*

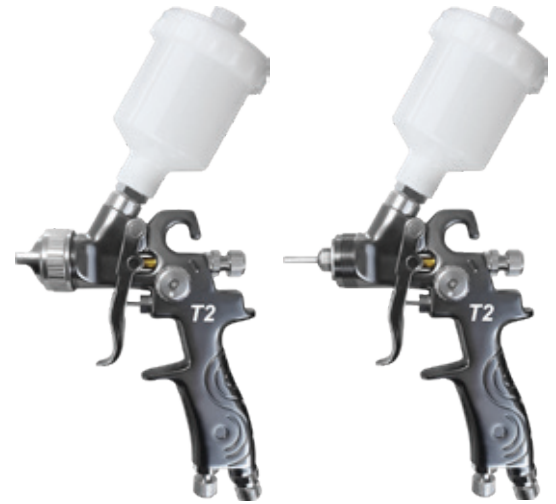

T2 & T2-Glaze

Techline T2 (Gravity Feed)

The T2 mini gravity spray gun is designed for professional grade touch up or easy glazing without the spray and wipe. With its HVLP compliance and low air consumption of 4 CFM, this spray gun is ideal for any touch up situation.

Features

- High transfer efficiency with HVLP technology.
- Air free glazing with the glazing nozzle.
- Low CFM options for onsite use with a portable compressor.

Panther 100G

Panther 100G Adhesive (Pressure Feed)

The Panther conventional series spray guns are high quality general purpose sprayers designed for spraying thin to viscous materials. All Panthers come complete with an all stainless steel fluid passage, built in air adjustment valve and setups including the tip and air cap making this ready to spray out of the box.

Features

- Superior atomization capabilities for heavy materials.
- Heavy-duty needle spring ensures material shut off at the nozzle.
- Stainless steel fluid passages, ideal for solvent or water based adhesives.

Tomcat 100C

Tomcat 100C General Purpose (Pressure Feed)

The Tomcat conventional series spray guns are high quality general purpose sprayers designed for spraying thin to viscous materials..

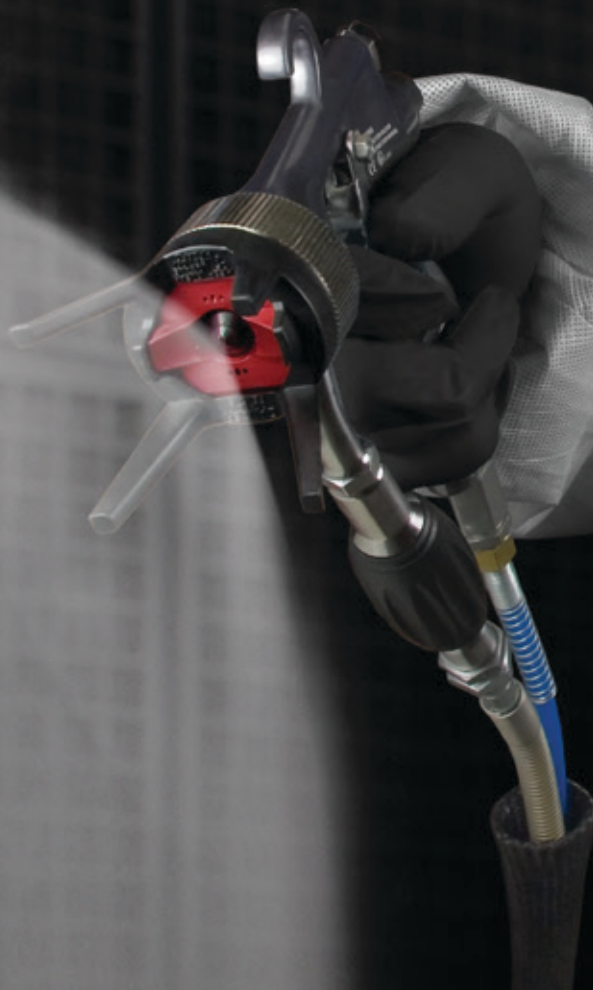

Features

- Dependable for various applications
- Fine finish atomization.
- Spray thick to thin materials.

Why Wagner?

Wagner is a leading global manufacturer of systems for surface finishing of liquid paints, powder coating, adhesives and sealant materials. We offer a complete range of technologies to fit the materials you use – liquid and powder coatings, adhesives or other fluid media – from material transport to mixing, dosing, movement and control technology through to application. Our solutions, including tailor-made interface management, installation and after-sales services will become a valuable link within your entire production process.
